INTRODUCTION:
- Preventive medicine is a daunting subject.
- USPSTF has 94 published recommendations that are intermittently updated.1
- Conflicting Recommendations from other organizations often exist.
- As an example, resident knowledge of colorectal screening was as low as 35% (22% for 1st year resident).2
- Around 65% of individuals are visual learners.3
- Medicine already has a popular and efficient method for distributing preventive medicine topics though CDC vaccine schedules.

A similar educational tool for USPSTF recommendations be created.

METHODS:
- LITERATURE SEARCH: A list of topics was collected from the official USPSTF website.
- Official publications describing these recommendations were acquired for review against our preset criteria.
- Inclusion (Active recommendations addressing patients 18 years or older on 1/05/2015).
- Exclusion (Inactive, Pregnancy related topics).

DATA COLLECTION:
- Data was collected on appropriate recommendations for grade of recommendation, gender, ages, presence of factors changing the recommendation, and other pertinent information.

DESIGN:
- Grade A and B topics were graphically represented and organized by ages of recommendation.
- Narrative descriptions of recommendations were written and reviewed.

RESULTS:
- Grade A/B Recommendations
- Alcohol use screening
- Depression
- Hypertension
- Colorectal cancer screening
- Cervical cancer screening
- Breast cancer screening
- Lung cancer screening
- Atrial fibrillation

GRADE A RECOMMENDATIONS
- Alcohol use screening
- Depression
- Hypertension
- Colorectal cancer screening
- Cervical cancer screening
- Breast cancer screening
- Lung cancer screening
- Atrial fibrillation

GRADE B RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE C RECOMMENDATIONS
- Colorectal Cancer Screening
- Breast Cancer Screening
- Lung Cancer Screening
- Atrial Fibrillation

GRADE D RECOMMENDATIONS
- CVD
- CHD
- Hypertension
- Diabetes
- COPD

GRADE E RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE F RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE G RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE H RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE I RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE J RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE K RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE L RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE M RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE N RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE O RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE P RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE Q RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE R RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE S RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE T RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE U RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE V RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE W RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE X RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE Y RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD

GRADE Z RECOMMENDATIONS
- CHD
- CVD
- Hypertension
- Diabetes
- COPD
